Installing DataTrac 3

1. When prompted, enter the required user information and your registration key. If you do not have a key, simply click "Evaluate DataTrac 3."

2. This option allows you to evaluate DataTrac 3 for free for 30 days.

3. Follow the on-screen instructions to install DataTrac 3 on your PC.

Directly Connect to a Logger

1 Connect your USB cable between the COM port on the Decagon data logger and the USB port of your computer.

2 Select the COM Port option from the Connect Via dropdown menu in the toolbar.

3 Click the connect button in the toolbar.

Configure a Logger

1 Once your logger is connected, click on Configure in your toolbar.

2 Click on Sensors and Measurements in the tree on the left and set your measurement interval.

3 Under Sensors and Measurements, select the sensor plugged into each port of the data logger from the Sensor Type dropdown menu.

Download from an Em50G

1. Select Setup > Create New > Em50G Subscription.
2. Enter the Device ID and password found on the brightly colored card that came inside your Em50G.
3. Click OK.
4. If you don't have a dataset, feel free to use a sample file. This Em50G is currently installed in an Eastern Washington vineyard. Use the following login information to check it out: Username: 5GBETA09 Password: lesh-ibid

Feedback and Bug Reporting
We are committed to ensuring the highest level of
customer satisfaction to our DataTrac 3 customers. To this
end, our development team has made it quick and easy to
send your feedback directly to us.
Simply click Help > Send Decagon Feedback.

We look forward to hearing from you.
