Re: Sole Source Certificate for Leaf Porometer model SC-1

To Whom It May Concern:

This is to certify that Decagon Devices, Inc., a company based in Pullman, WA, is the sole manufacturer of the Leaf Porometer model SC-1. The SC-1 is the only instrument available that uses the steady-state technique of measuring the vapor pressure at two points along a fixed path and distance to calculate stomatal conductance. The SC-1 is made in the factory here in Pullman and sold directly to the end user in the domestic U.S., and through distributors only internationally. Any comments or questions regarding this can be brought to my attention.

Sincerely,

A handwritten signature in black ink that reads "Matt Galloway".

Matt Galloway
Intl. Distribution Manager
