Re: Sole Source Certificate for ZL6 Data Logger

To Whom It May Concern:

This is to certify that METER Group, Inc., a company based in Pullman, WA, is the sole designer and manufacturer of the ZL6 data logger.

The ZL6 measures up to six METER digital, analog, or pulse sensors each minute. The logger stores up to 80,000 readings at a user-defined logging interval. The built-in solar panel charges the included six AA NiMH rechargeable batteries for multi-year deployments. The ZL6 has an IP55 enclosure rating that is impact- and UV-resistant. Simple setup via Bluetooth with ZENTRA Utility app or over a USB connection to a laptop to simplify deployments (no programming required). The ZL6 includes integrated cellular or Wi-Fi communication hardware to automatically upload data to ZENTRA Cloud software while also storing data in non-volatile flash for backup and direct downloading. The logger also features a multi-constellation GNSS receiver and reference barometer to augment sensor readings with metadata.

The ZL6 data logger is manufactured at METER Group's facility in Pullman, Washington, and sold directly to the end-user (as well as to domestic irrigation management consultants and international distributors). The product has a one-year warranty that covers all necessary maintenance or repairs against manufacturing defects.

Any comments or questions regarding this document can be brought to my attention.

Sincerely,

Todd Martin
